

Dear Friend of Health Outreach,

The current Covid-19 conditions in Guatemala and Honduras have compelled Health Outreach Inc. to cancel our humanitarian projects in these countries this coming January. Uncertain travel restrictions have also made it difficult to plan reliable transportation.

We are not pleased with this decision but feel it is the best one in order to protect our volunteers and supporters in Guatemala and Honduras. The Board of Health Outreach was unanimous in this decision when it met in September.

Our timeframe for our next project is uncertain but we are hoping to still travel in 2022 rather than rescheduling for an entire year. In the meantime we continue to support our partners who continue to work tirelessly “on the ground” as they help our communities.

Thank you for your thoughts and ongoing support of Health Outreach.

The Board of Health Outreach
