- Friday: Work in AK Tenamit 8:00 am - 12:00 pm.

Suggestions:

It would be better to set the dental boat and the medical jornada in different villages the same day to avoid confusion for the patients who will want to access both services. Because setting the dental boat at the village's beach and the medical clinic at the village will confuse the patients because of the distance and the time frame. They will probably not be able to access both services.
