

GUATEMALA & DENTISTRY FOR HONDURAS 2021

We regret to inform you that Health Outreach will be cancelling its humanitarian projects "Guatemala 2021" and "Dentistry for Honduras 2021" slated for January, February, and March 2021.

There remains uncertainty on the spread of Covid-19 in Guatemala and restrictions on local and international travel. Most importantly, the health and safety of our volunteers and partners are our priority.

Although this may be unwelcome and discouraging news, we're happy to have completed our February projects in Guatemala and Honduras without any problems related to the pandemic.

Our timeframe for the next Health outreach project is uncertain. Although we are on hold as outsiders, our partner's efforts in Guatemala continue as they can now access our communities. Our other projects in 2021 are still being developed as we monitor how the global pandemic may affect our overseas operations. We may be planning a small select team in Guatemala to assist our partners and organize future Health Outreach projects on the ground. The focus will be training and supplying our local partners so they can carry on our efforts.

Thank you for your ongoing support of Health Outreach.
